#### Optional Strategies

This section contains a menu of optional activating strategies. Teachers may pick and choose from this menu the strategies that are the best match for their classrooms. The strategies are designed to provide the students with background knowledge on the issues of homelessness and poverty, to provoke thought and to open the door to the consideration of new ideas and actions. These Activating Strategies provide a solid foundation for the students to move into the “investigative” and “action” stages of the Program.
